Note: *Please create a new account if you don't have an existing one*

This professional training course is designed for both communication and technical professionals working in nuclear regulation, policy, operations, emergency preparedness, and stakeholder engagement. Participants will gain insights into practical tools and techniques to support effective public communication around nuclear and radiological risks.

Course Highlights:

- Two virtual preparatory modules
- Four full days of in-person training
- Interactive lectures, hands-on exercises, and group case studies
- Certificate of professional participation
- International expert instructors and peer learning opportunities

Topics include:

- Risk communication fundamentals
- Trust-building strategies
- Misinformation and disinformation
- Plain language and message clarity
- Media and social media engagement

Please feel free to share this invitation with relevant teams and partners in your organisation or wider network!
